ABOUT ME

Software engineering student seeking practical experience to enhance software and AI engineering skills, applying them across various industries.

EDUCATION

South Mediterranean University — Software Engineering Program	2025 – 2026
South Mediterranean University — MedTech Pre-Engineering Program	2023 – 2025
Baccalaureate of Experimental Science Diploma	2022 – 2023

EXPERIENCE

Junior Project — Smart Crop Disease Reporter	2026
- Built an Android app powered by an AI pipeline that detects tree leaves, identifies the species, and scans for diseases. - Used YOLOv8-nano for detection and segmentation, MobileNetV2-224 for classification, and Gemini Flash Preview for report generation. Repo: https://github.com/FaresAyadi055/ISS396.git	
Pet ID.tn — Startup	2026
- Built a platform for registering and identifying pets via smart tags with QR codes or NFC and a unique ID. - Implemented instant scan notifications and outsourced broadcast alerts for lost-pet notifications. - Built with Svelte, Hono, and SQLite; deployed on Cloudflare. URL: https://petid.tn	
SMU FabLab	2026
Built an inventory management system using Nuxt.js with admin, student, and instructor roles. Repo: https://github.com/FaresAyadi055/SMU_Labs	
Mabruka Internship	2025
Trained an olive tree variety classification vision model on images of olive leaves spanning 14 varieties.	
Sophomore Project — Healthcare Web Application	2025
Developed a web application designed to enhance healthcare accessibility and streamline personal health management. Repo: https://github.com/FaresAyadi055/ISS296.git	
SMU MakerSpace	2025
Built an inventory management system with semantic search using Python, MySQL, and sentence transformers. Repo: https://github.com/FaresAyadi055/makerspace	
DevFest Hackathon	2024
Developed an AI computer vision model for disease detection in crops. HuggingFace: https://huggingface.co/spaces/DripKermit/Disease_Detection_in_Plants	
UBCI — Internship	2024
Observation internship; documented IT department operations, focusing on data security and IT responsibilities.	
Freshman Project — Smart Home Automation	2023

- Built a voice-controlled smart house model with IoT integration (lights, fans, garage, TV, etc.), with data collected via MySQL on a Flask server.

Repo: <https://github.com/FaresAyadi055/voice-controlled-smart-home-automation-project>

SKILLS

Programming Languages: Python, Java, C, SQL, HTML/CSS/JavaScript/TypeScript

Frontend Frameworks: React, Vue, Svelte

Backend Frameworks: Express, Flask, Next, Nuxt, Hono

Mobile Development: React Native, Android Studio

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Data Science / AI Frameworks: NumPy, Pandas, Matplotlib, PyTorch, Scikit-learn, Flask

Core Skills: Prompt Engineering, Machine Learning, Deep Learning, Computer Vision, Automation with Python, Mobile Development, Full-Stack Development

CERTIFICATES

- AI Engineering Professional Certificate — IBM
- Databases and SQL for Data Science with Python — IBM
- Python for Data Science & AI Development — IBM
- Generative AI: Prompt Engineering Basics — IBM

LANGUAGES

- Arabic — Native
- English — Fluent
- French — Fluent
- German — Basic
